Instruction and use manual  
Body & Cover

# ISTRUZIONI DI MONTAGGIO BODY

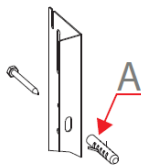

- Attention the installation of the heating elements must be carried out by qualified personnel.
- Detect the center distance of the wall attachment and fix the two well-leveled beams. Attention: use the plugs suitable for the type of existing wall Fig. A
- Hang the radiator on the beams making sure it is properly engaged Fig.B
- Engage the safety coupling (normally present only in the electric versions) and tighten the screw tightly. Fig. C
- Connect the radiator to the valves, refill by acting on the air vent.
- Verify that there are no water leaks. In case of leaks, close the valves immediately and call Cobrillo technical assistance.
- Mount the cover on the radiator only after completing the complete installation procedure.

## CONTENTS OF THE BOX

The packaging contains:

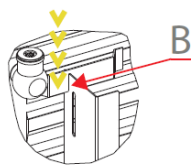

- Wall fixing brackets painted with Polyester powders in the same color as the radiator
- ½ " manual air vent valve and male cap with ½" o-ring
- Safety hook to be applied on the fixing brackets
- Instruction and use manual

Keep the original packaging until the radiator is completely installed

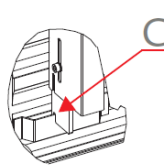

Utilizzare un tassello idoneo al muro in cui verrà installato il termoarredo.

Use a tile suitable for the wall where the heated towel rail will be installed.

Innestare correttamente il radiatore alla trave.

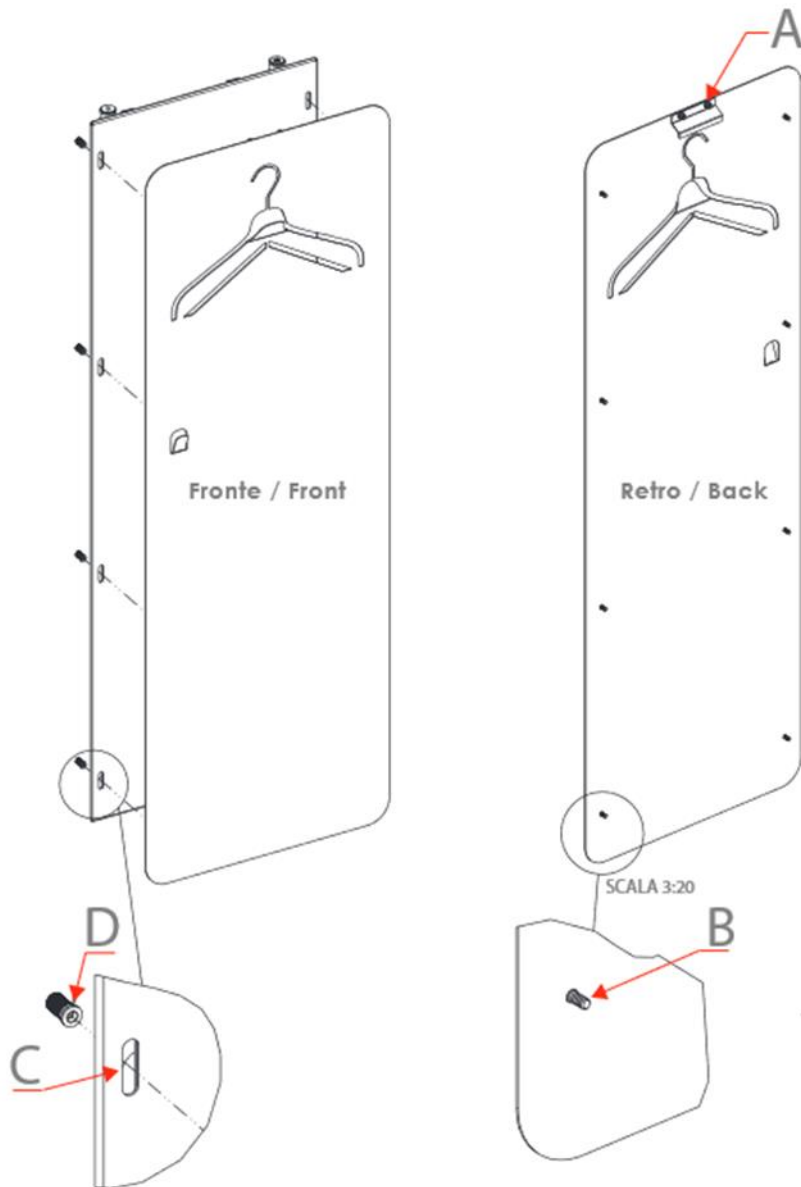

Insert properly the heated element to the beam.

Innestare la sicurezza inferiore.

Engage the lower security.

# ASSEMBLY INSTRUCTIONS COVER

- Do not mount the COVER before the body has been fixed to the wall.
- Hang the COVER on the BODY using the safety flap "A".
- Insert the pins "B" in the slots "C".
- Close the cover by screwing the knobs "D".
- THE KNOBS ARE TIGHTENED WITH THE HAND FORCE ONLY, DO NOT USE TOOLS.

## BOX CONTENT

The Cover packaging contains:

- 8 knobs for the 1460 mm Cover and 10 fixing screws for the 1860 mm Cover, already applied to the Cover (to be removed and replaced after installing the Cover on the Body)
- Instruction and use manual

## USE

- THE RADIATOR MUST BE INSTALLED by a specialized technician, following the regulations in force in the country of installation.
- Before connecting the appliance to the electrical voltage, make sure that the connection values shown on the plate located on the appliance correspond to those of the electrical network, if in doubt, consult a qualified professional
- When fixing the heated towel rail to the wall, pay particular attention not to damage the electronic thermostat and the electrical connection cable.
- Check that there are no damages on the power supply cable and on any part of the radiator, if there are, immediately disconnect the power supply and call a specialized technician or Cobrillo technical assistance

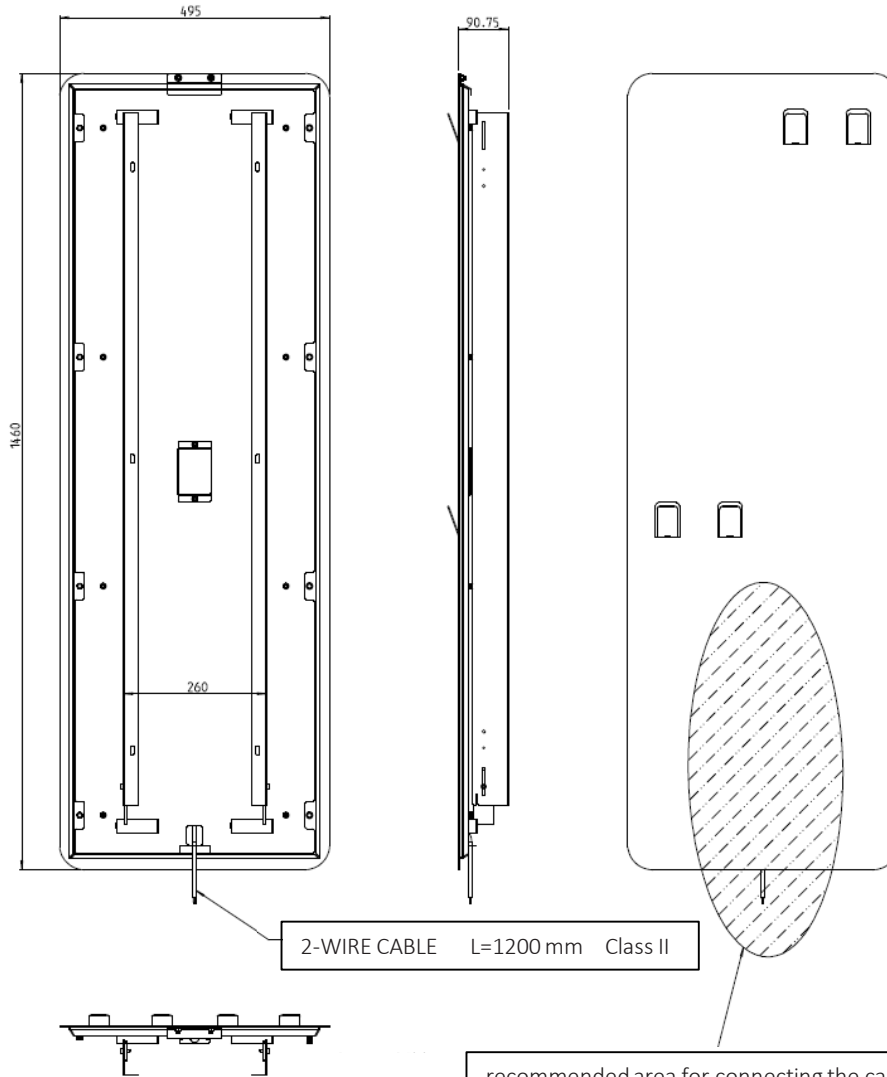

## MAINTENANCE

Dear Customer, Cobrillo products have been designed and built for convective radiant domestic heating, the installation of which must be done only and exclusively by qualified technicians who are aware of the safety regulations in force in the place of installation. However, the following generalities must also be respected:

- The heated towel rails should be cleaned periodically using a soft cloth slightly moistened with water to avoid damaging the painted and / or chromed surface. Cleaning the radiator should always be done with the radiator cold.
- Avoid putting wet cloths on the surface of the radiator, you could speed up a corrosion process or damage its surface treatment.
- Periodically check the anchoring of the radiator to the wall. If the radiator should become detached from the wall it could cause very serious damage to people, animals, things

## SAFETY WARNINGS

- THE RADIATOR MUST BE INSTALLED by a specialized technician, following the regulations in force in the country of installation
- THE RADIATOR MUST ALWAYS BE CONNECTED TO AN ENVIRONMENT THERMOSTAT, as specified in current regulations
- The heated towel rail is to be used only for the use described in the manual
- The heated towel rail is delivered in an appropriate packaging; remove it only after installing it
- Do not place it on the ground or on the wall on the front side, but only on the rear side
- Do not apply accessories other than those prescribed or recommended by the manufacturer to the radiator
- Only connect the heated towel rail to the mains after fixing it to the wall
- Children under 3 years old must be kept away unless they are under constant surveillance. Children between 3 and 14 years of age and people with reduced physical, sensory and mental abilities, or lacking appropriate experience or knowledge, can use the heated towel rail, provided that it has been positioned or installed in the normal position expected and have received instructions and training on how to use the appliance safely and understand its potential dangers well. Children under the age of 14 must not connect the power plug, adjust or clean the appliance.
- If the power cable is damaged, the repair or replacement of the complete electric heater must be carried out directly by the manufacturer or by the technical assistance service.
- Do not use corrosive, abrasive or solvent products to clean the radiator and the plastic parts containing the electrical parts
- Avoid installing the heaters in areas exposed to aggressive acids or vapors
- The heated towel rails can be used to heat, to keep the towel warm or to warm the fabrics but not to dry the laundry
- Do not place weights over 5kg on the radiator
- Check that there are no fluid leaks, in the event of a leak, immediately close the radiator using the valves and call Cobrillo technical assistance or a specialized technician.
- IT IS ABSOLUTELY FORBIDDEN:
- Cut, damage or modify the power cord

220 - 240 V ~ 50/60 Hz 900W IP21

**Body H =1420 mm**

Mod. 01204601420EA0  
220 - 240 V ~ 50/60 Hz 700W IP21

recommended area for connecting the cable to the system  
WARNING the radiator must be connected by a specialized technician to a room thermostat or similar room temperature regulation device

## WARRENTY

- COBRILLO SRL guarantees the products illustrated in the terms and for the period of time established by the national law transposing the WARRANTIES Directive 1999/44 / EC and 2011/83 / EU, in force in the country in which the customer (consumer) purchased the product with brand COBRILLO SRL. The COBRILLO SRL guarantee is not in any case a substitute for the one provided for by law.
- The WARRANTY starts from the purchase date proven by a document with fiscal validity (invoice, tax receipt or sales receipt) showing the indication of the product itself.
- In case of defects in material or workmanship, COBRILLO SRL will repair, replace defective parts or replace the entire product free of charge in accordance with the WARRANTY Directive 1999/44 / EC, excluding any other form of compensation, both legal and conventional. without prejudice to legal obligations.
- The warranty will be effective after examining the defects and their causes at the Cobrillo Srl headquarters. The material to be replaced or repaired must be delivered ex warehouse to Cobrillo Srl.
- Any replacement of defective components or part of the aforementioned products will not extend the original warranty period. The warranty on replaced parts will therefore cease together with the expiry of the warranty period initially established on the complete product.
- In the event of defects in material or workmanship, Cobrillo Srl. Will replace the defective part free of charge or repair / replace the entire product, at its discretion and in any case in compliance with the terms of the law; all forms of compensation, both legal and conventional, are strictly excluded, except as required by mandatory rules
- The warranty lapses if the indication of the production batch is tampered with and / or removed.
- The manufacturer declines any responsibility for any damage that may, directly or indirectly, derive to people or pets or things as a result of failure to comply with all the requirements indicated in the specific product assembly and maintenance instruction booklet.
- Parts of the product which, sent for repair to an authorized COBRILLO SRL site, are damaged during the journey are not considered as guarantees.

### The warrenty only works if :

- the customer has made the balance of payments within the pre-established terms;
- the material has been stored in good condition and protected from the weather before being installed
- the material has not been damaged during transport, handling or installation;
- there has been no tampering or repair of the products without the authorization of Cobrillo Srl;
- Periodic emptying or loading of the system has not been carried out;
- The characteristics of the system follow the values of the UNI 8065 standard;
- The caps and accessories used are those regularly supplied by Cobrillo;
- the radiators are not connected to the domestic hot water system or to systems with an open expansion tank;
- If a corrosion inhibitor is used, it is compatible with all the materials present in the heating bodies.
- the operating pressure and temperature indicated in the manual correspond to those of use;
- the circuit is free from metal, calamine, grease residues and there is no gas. Before starting the system, wash it to eliminate mechanical processing residues and / or residues during installation.
- the Customer does not make any changes or variations on his own initiative on the contested materials without our prior approval
- There are no damages to the product due to interventions by unauthorized personnel;
- There are no anomalies or faults dependent on the power supply network;
- There is no malfunction due to incorrect sizing;
- Original parts or spare parts used and authorized by COBRILLO SRL are used;
- There are no damages caused by accidents, fires, natural disasters, accidents in general;
